## **Advanced Modeling and Optimization of Manufacturing Processes: International Research and Development (Springer Series in Advanced Manufacturing) R. Venkata Rao**

Advanced Modeling and Optimization of Manufacturing Processes presents a comprehensive review of the latest international research and development trends in the modeling and optimization of manufacturing processes, with a focus on machining. It uses examples of various manufacturing processes to demonstrate advanced modeling and optimization techniques. Both basic and advanced concepts are presented for various manufacturing processes, mathematical models, traditional and non-traditional optimization techniques, and real case studies. The results of the application of the proposed methods are also covered and the book highlights the most useful modeling and optimization strategies for achieving best process performance. In addition to covering the advanced modeling, optimization and environmental aspects of machining processes, Advanced Modeling and Optimization of Manufacturing Processes also covers the latest technological advances, including rapid prototyping and tooling, micromachining, and nano-finishing. Advanced Modeling and Optimization of Manufacturing Processes is written for designers and manufacturing engineers who are responsible for the technical aspects of product realization, as it presents new models and optimization techniques to make their work easier, more efficient, and more effective. It is also a useful text for practitioners, researchers, and advanced students in mechanical, industrial, and manufacturing engineering.

### **From reader reviews:**

#### **Aletha Bassett:**

Have you spare time to get a day? What do you do when you have much more or little spare time? Yeah, you can choose the suitable activity with regard to spend your time. Any person spent their own spare time to take a stroll, shopping, or went to the Mall. How about open or maybe read a book titled Advanced Modeling and Optimization of Manufacturing Processes: International Research and Development (Springer Series in Advanced Manufacturing)? Maybe it is to become best activity for you. You realize beside you can spend your time together with your favorite's book, you can more intelligent than before. Do you agree with their opinion or you have various other opinion?

#### **Monica Bonner:**

In this 21st centuries, people become competitive in every way. By being competitive right now, people have do something to make these individuals survives, being in the middle of the crowded place and notice by means of surrounding. One thing that at times many people have underestimated the idea for a while is reading. Yes, by reading a e-book your ability to survive raise then having chance to remain than other is high. For you who want to start reading a new book, we give you that Advanced Modeling and Optimization of Manufacturing Processes: International Research and Development (Springer Series in Advanced Manufacturing) book as beginner and daily reading book. Why, because this book is more than just a book.

#### **Clara Williams:**

Spent a free time for you to be fun activity to try and do! A lot of people spent their down time with their family, or their friends. Usually they undertaking activity like watching television, going to beach, or picnic inside the park. They actually doing same every week. Do you feel it? Do you want to something different to fill your own free time/ holiday? Could be reading a book may be option to fill your cost-free time/ holiday. The first thing you will ask may be what kinds of book that you should read. If you want to try look for book, may be the publication untitled Advanced Modeling and Optimization of Manufacturing Processes: International Research and Development (Springer Series in Advanced Manufacturing) can be very good book to read. May be it might be best activity to you.

#### **John Johnson:**

The book Advanced Modeling and Optimization of Manufacturing Processes: International Research and Development (Springer Series in Advanced Manufacturing) has a lot details on it. So when you make sure to read this book you can get a lot of profit. The book was compiled by the very famous author. Mcdougal makes some research just before write this book. That book very easy to read you can find the point easily after reading this article book.
