Paul C. Brown

## Architecting Composite Applications and Services with TIBCO (TIBCO Press) Paul C. Brown

“Paul Brown has done a favor for the TIBCO community and anyone wanting to get into this product set. Architecting TIBCO solutions without knowing the TIBCO architecture fundamentals and having insight to the topics discussed in this book is risky to any organization. I fully recommend this book to anyone involved in designing solutions using the TIBCO ActiveMatrix products.”

—Nikky Sooriakumar, TIBCO Architect, PruHealth

“An effective primer for building composite services using TIBCO, this book provides a holistic approach to strategy integrated with implementation details. I find it tremendously useful in moving recursively from business solutions to design patterns to architecture. Tangible examples are provided that build to composite services. And advanced topics are explored that add another valuable implementation dimension. I recommend this book to software architects who need to quickly build an effective business- services-oriented environment.”

—Abby H. Brown, Ph.D., Enterprise Architect, Intel Corp.

The architecture series from TIBCO® Press comprises a coordinated set of titles for software architects and developers, showing how to combine TIBCO components to design and build real-world solutions. TIBCO’s product suite comprises components with functionality ranging from messaging through services, service orchestration, business process management, master data management, and complex event processing.

In composite applications and services, multiple components collaborate to provide the required functionality. There are many possible architectures for these distributed solutions: Some will serve the enterprise well, while others will lead to dead-end projects. *Architecting Composite Applications and Services with TIBCO®* shows how to create successful architectures with TIBCO products for both overall solutions and individual services. This guide builds on the basic design patterns and product information presented in the first title in the series, *TIBCO® Architecture Fundamentals* (Addison-Wesley, 2011).

After reading this title, you will be able to

- Create architectures for solutions, service specifications, and service implementations
- Understand the intended TIBCO product roles in composite applications and services
- Define manageable approaches to service versioning and naming
- Conduct and interpret performance benchmarks
- Identify and select appropriate design patterns for a variety of tasks

*Architecting Composite Applications and Services with TIBCO®* is intended primarily for project architects defining overall solutions and specifying the supporting components and services. TIBCO developers, enterprise architects, and technical managers will also find material of interest. No specific prior knowledge of architecture is assumed.

### **From reader reviews:**

#### **William Johnson:**

Hey guys, do you would like to finds a new book to study? May be the book with the headline Architecting Composite Applications and Services with TIBCO (TIBCO Press) suitable to you? The book was written by well-known writer in this era. Often the book untitled Architecting Composite Applications and Services with TIBCO (TIBCO Press)is a single of several books in which everyone read now. This specific book was inspired a number of people in the world. When you read this guide you will enter the new way of measuring that you ever know just before. The author explained their strategy in the simple way, so all of people can easily to comprehend the core of this publication. This book will give you a great deal of information about this world now. To help you see the represented of the world in this particular book.

#### **Ricky Dotson:**

Reading a publication can be one of a lot of action that everyone in the world really likes. Do you like reading book so. There are a lot of reasons why people love it. First reading a reserve will give you a lot of new info. When you read a book you will get new information since book is one of numerous ways to share the information or even their idea. Second, reading a book will make an individual more imaginative. When you examining a book especially tale fantasy book the author will bring someone to imagine the story how the characters do it anything. Third, you may share your knowledge to some others. When you read this Architecting Composite Applications and Services with TIBCO (TIBCO Press), you could tells your family, friends as well as soon about yours reserve. Your knowledge can inspire average, make them reading a guide.

#### **Gilbert Pellerin:**

People live in this new morning of lifestyle always make an effort to and must have the extra time or they will get lots of stress from both lifestyle and work. So , if we ask do people have extra time, we will say absolutely of course. People is human not really a robot. Then we inquire again, what kind of activity are there when the spare time coming to an individual of course your answer will certainly unlimited right. Then ever try this one, reading textbooks. It can be your alternative with spending your spare time, the book you have read is Architecting Composite Applications and Services with TIBCO (TIBCO Press).

#### **Brandon Seymour:**

Are you kind of active person, only have 10 or 15 minute in your day time to upgrading your mind skill or thinking skill actually analytical thinking? Then you are receiving problem with the book in comparison with can satisfy your small amount of time to read it because this time you only find reserve that need more time to be examine. Architecting Composite Applications and Services with TIBCO (TIBCO Press) can be your answer since it can be read by anyone who have those short time problems.
