A Timber Framer's Workshop: Joinery, Design & Construction of Traditional Timber Frames Steve Chappell

This revised edition of *A Timber Framer's Workshop* has over 150 new photos and includes updated engineering specifications for pegged joinery, along with expanded in-depth technical information on the joinery, design and construction of Traditional Timber Frames.

The major portion of *A Timber Framer's Workshop* was first written back in 1983. Over a period of a number of years several revisions and additions took place, as it was used as the handout workshop manual for *Fox Maple Timber Framing Workshops*. At last, it was published for general distribution in 1998.

When this book was first published in 1998, scientific testing results for pegged mortise and tenon joinery simply did not exist. The corollaries that could be made at that time were drawn from testing results for bolted connections. This is common in engineering as the essential physical laws concerning force and motion, primarily Newtonian physics, are symmetrical. However, nothing ever beats a direct test for a specific condition as the results end with an emphatic exclamation point. In the past five or six years testing has at last been carried out for a number of the most common pegged joinery conditions and the results have been published. The impetus for this revision was in large part to update and to include these new testing results so that the readers would be privy to the latest engineering results available for timber frame joinery.

Along the way, over 150 new photos and drawings were added and editorial additions were made to clarify specific conditions, or to more fully explain a critical aspect of timber framing. While the essential book is the same, virtually every element is expanded in some way to paint a more vibrant picture of the technical aspects of how to build a traditional timber frame. In addition, there is an expanded element of color and nuance to help the reader more fully understand the magic of timber framing... and that timber framing really is the Jazz of building.

Illustrated with over 500 photos and CAD drawings.

From reader reviews:

Debra Sims:

Do you have favorite book? Should you have, what is your favorite's book? Reserve is very important thing for us to know everything in the world. Each reserve has different aim as well as goal; it means that guide has different type. Some people feel enjoy to spend their time to read a book. They can be reading whatever they take because their hobby is actually reading a book. Consider the person who don't like reading a book? Sometime, particular person feel need book whenever they found difficult problem or maybe exercise. Well, probably you will need this A Timber Framer's Workshop: Joinery, Design & Construction of Traditional Timber Frames.

Allen Scheiber:

Book is definitely written, printed, or illustrated for everything. You can understand everything you want by a e-book. Book has a different type. To be sure that book is important thing to bring us around the world. Next to that you can your reading expertise was fluently. A reserve A Timber Framer's Workshop: Joinery, Design & Construction of Traditional Timber Frames will make you to always be smarter. You can feel a lot more confidence if you can know about every little thing. But some of you think that will open or reading some sort of book make you bored. It is not make you fun. Why they might be thought like that? Have you looking for best book or suited book with you?

Betty Norsworthy:

That book can make you to feel relax. This particular book A Timber Framer's Workshop: Joinery, Design & Construction of Traditional Timber Frames was colorful and of course has pictures around. As we know that book A Timber Framer's Workshop: Joinery, Design & Construction of Traditional Timber Frames has many kinds or type. Start from kids until adolescents. For example Naruto or Investigator Conan you can read and believe you are the character on there. Therefore , not at all of book are generally make you bored, any it offers you feel happy, fun and rest. Try to choose the best book for you and try to like reading which.

Mattie Martin:

Reading a guide make you to get more knowledge from the jawhorse. You can take knowledge and information coming from a book. Book is written or printed or created from each source this filled update of news. Within this modern era like currently, many ways to get information are available for you. From media social including newspaper, magazines, science guide, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Ready to spend your spare time to open your book? Or just searching for the A Timber Framer's Workshop: Joinery, Design & Construction of Traditional Timber Frames when you desired it?
