Brownian Motion and Stochastic Calculus (Graduate Texts in Mathematics) (Volume 113)

Ioannis Karatzas, Steven Shreve

Brownian Motion and Stochastic Calculus (Graduate Texts in Mathematics) (Volume 113) Ioannis Karatzas, Steven Shreve

A graduate-course text, written for readers familiar with measure-theoretic probability and discrete-time processes, wishing to explore stochastic processes in continuous time. The vehicle chosen for this exposition is Brownian motion, which is presented as the canonical example of both a martingale and a Markov process with continuous paths. In this context, the theory of stochastic integration and stochastic calculus is developed, illustrated by results concerning representations of martingales and change of measure on Wiener space, which in turn permit a presentation of recent advances in financial economics. The book contains a detailed discussion of weak and strong solutions of stochastic differential equations and a study of local time for semimartingales, with special emphasis on the theory of Brownian local time. The whole is backed by a large number of problems and exercises.

From reader reviews:

Sheryl Hicks:

This book untitled Brownian Motion and Stochastic Calculus (Graduate Texts in Mathematics) (Volume 113) to be one of several books that will best seller in this year, here is because when you read this book you can get a lot of benefit in it. You will easily to buy this book in the book shop or you can order it by way of online. The publisher of this book sells the e-book too. It makes you quickly to read this book, since you can read this book in your Cell phone. So there is no reason to you to past this guide from your list.

Dora Gourley:

Reading a book being new life style in this calendar year; every people loves to study a book. When you read a book you can get a wide range of benefit. When you read textbooks, you can improve your knowledge, simply because book has a lot of information on it. The information that you will get depend on what kinds of book that you have read. If you wish to get information about your review, you can read education books, but if you want to entertain yourself look for a fiction books, this sort of us novel, comics, and also soon. The Brownian Motion and Stochastic Calculus (Graduate Texts in Mathematics) (Volume 113) will give you a new experience in reading through a book.

Doreen Williams:

In this era globalization it is important to someone to receive information. The information will make someone to understand the condition of the world. The healthiness of the world makes the information quicker to share. You can find a lot of sources to get information example: internet, magazine, book, and soon. You will observe that now, a lot of publisher this print many kinds of book. Often the book that recommended to you personally is Brownian Motion and Stochastic Calculus (Graduate Texts in Mathematics) (Volume 113) this guide consist a lot of the information from the condition of this world now. This kind of book was represented how does the world has grown up. The terminology styles that writer use to explain it is easy to understand. Typically the writer made some analysis when he makes this book. Honestly, that is why this book suited all of you.

Timothy Kahle:

Reading a publication make you to get more knowledge from that. You can take knowledge and information from your book. Book is composed or printed or illustrated from each source in which filled update of news. In this modern era like at this point, many ways to get information are available for you. From media social such as newspaper, magazines, science book, encyclopedia, reference book, novel and comic. You can add your knowledge by that book. Do you want to spend your spare time to spread out your book? Or just in search of the Brownian Motion and Stochastic Calculus (Graduate Texts in Mathematics) (Volume 113) when you necessary it?
