This management-driven, comprehensive book on ecosystem ecology is the only one on the market that covers the entire field, linking conventional ecosystem-level forest ecology to forest management. It features ecological site classification, ecosystem modeling, and strong sections on ecological diversity and the physical environment. It provides a comprehensive treatment of forestry issues; as well as excellent coverage of ecosystem management, landscape management, natural disturbances and their emulation. An excellent reference work for professional foresters, resource managers, wildlife managers, parks managers, forest planners and policy makers, and forestry researchers.
