As you sit in your chair, reading this manuscript, have you ever stopped for a moment to ponder the route that energy takes in getting to your home? Have you ever wondered how the power sources that are connected to your home have changed in the last 20, 50 or 500 years? If you're like most people, these questions may have briefly arisen in your mind but you do not yet have all of the answers. You have yet to become energy literate!

I used the word qualitative in the previous sentence to allude to the fact that it is not necessary to be an engineer, lawyer or accountant to be energy literate.
