The new third edition provides environmental scientists with an approach that focuses on visuals rather than excessive content. The streamlined coverage discusses the basic science so students walk away with a strong understanding of the facts. New *Think Critically* and *Data Interpretation* features encourage them to analyse visuals and graphs to place information in context. The illustrations have been improved and additional opportunities to conduct real data analysis have been added. The *What a Scientist Sees* feature also gives environment scientists a real-world perspective of how a concept or phenomenon is applied in the field.
