## Remote Sensing of Natural Resources (Remote Sensing Applications Series)

Highlighting new technologies, **Remote Sensing of Natural Resources** explores advanced remote sensing systems and algorithms for image processing, enhancement, feature extraction, data fusion, image classification, image-based modeling, image-based sampling design, map accuracy assessment and quality control. It also discusses their applications for evaluation of natural resources, including sampling design, land use and land cover classification, natural landscape and ecosystem assessment, forestry, agriculture, biomass and carbon-cycle modeling, wetland classification and dynamics monitoring, and soils and minerals mapping.

The book combines review articles with case studies that demonstrate recent advances and developments of methods, techniques, and applications of remote sensing, with each chapter on a specific area of natural resources. Through a comprehensive examination of the wide range of applications of remote sensing technologies to natural resources, the book provides insight into advanced remote sensing systems, technologies, and algorithms for researchers, scientists, engineers, and decision makers.

### **From reader reviews:**

#### **Manuel Thomas:**

What do you think about book? It is just for students since they are still students or the idea for all people in the world, what the best subject for that? Just you can be answered for that concern above. Every person has diverse personality and hobby for every other. Don't to be obligated someone or something that they don't wish do that. You must know how great along with important the book Remote Sensing of Natural Resources (Remote Sensing Applications Series). All type of book can you see on many solutions. You can look for the internet sources or other social media.

#### **Arthur Elsberry:**

Now a day people that Living in the era where everything reachable by talk with the internet and the resources within it can be true or not need people to be aware of each facts they get. How many people to be smart in having any information nowadays? Of course the answer is reading a book. Reading a book can help people out of this uncertainty Information specifically this Remote Sensing of Natural Resources (Remote Sensing Applications Series) book since this book offers you rich data and knowledge. Of course the information in this book hundred pct guarantees there is no doubt in it you know.

#### **Kirk Qualls:**

Do you have something that you prefer such as book? The guide lovers usually prefer to choose book like comic, brief story and the biggest an example may be novel. Now, why not hoping Remote Sensing of Natural Resources (Remote Sensing Applications Series) that give your entertainment preference will be satisfied simply by reading this book. Reading routine all over the world can be said as the way for people to know world considerably better then how they react when it comes to the world. It can't be stated constantly that reading addiction only for the geeky man but for all of you who wants to possibly be success person. So , for every you who want to start reading through as your good habit, you may pick Remote Sensing of Natural Resources (Remote Sensing Applications Series) become your starter.

#### **Jacqueline Carter:**

The book untitled Remote Sensing of Natural Resources (Remote Sensing Applications Series) contain a lot of information on the idea. The writer explains the woman idea with easy approach. The language is very clear and understandable all the people, so do not worry, you can easy to read that. The book was authored by famous author. The author provides you in the new age of literary works. It is easy to read this book because you can keep reading your smart phone, or program, so you can read the book inside anywhere and anytime. If you want to buy the e-book, you can available their official web-site as well as order it. Have a nice read.
