Identification Modeling and Characteristics of Miniature Rotorcraft Bernard Mettler

Identification Modeling and Characteristics of Miniature Rotorcraft introduces an approach to developing a simple and effective linear parameterized model of vehicle dynamics using the CIFERâ identification tool created by the Army/NASA Rotorcraft Division. It also presents the first application of the advanced control system optimization tool CONDUITâ to systematically and efficiently tune control laws for a model-scale UAV helicopter against multiple and competing dynamic response criteria.

Identification Modeling and Characteristics of Miniature Rotorcraft presents the detailed account of how the theory was developed, the experimentation performed, and how the results were used.

This book will serve as a basic and illustrative guide for all students that are interested in developing autonomous flying helicopters.

From reader reviews:

John Moore:

Have you spare time for any day? What do you do when you have a lot more or little spare time? Yep, you can choose the suitable activity intended for spend your time. Any person spent their very own spare time to take a walk, shopping, or went to the actual Mall. How about open or perhaps read a book entitled Identification Modeling and Characteristics of Miniature Rotorcraft? Maybe it is being best activity for you. You realize beside you can spend your time along with your favorite's book, you can cleverer than before. Do you agree with its opinion or you have various other opinion?

Mathew Jones:

The book Identification Modeling and Characteristics of Miniature Rotorcraft make one feel enjoy for your spare time. You may use to make your capable a lot more increase. Book can to be your best friend when you getting pressure or having big problem along with your subject. If you can make reading through a book Identification Modeling and Characteristics of Miniature Rotorcraft to become your habit, you can get a lot more advantages, like add your own capable, increase your knowledge about several or all subjects. It is possible to know everything if you like available and read a guide Identification Modeling and Characteristics of Miniature Rotorcraft. Kinds of book are a lot of. It means that, science publication or encyclopedia or other individuals. So , how do you think about this reserve?

Laree Drummond:

The book Identification Modeling and Characteristics of Miniature Rotorcraft can give more knowledge and information about everything you want. Why must we leave the good thing like a book Identification Modeling and Characteristics of Miniature Rotorcraft? Wide variety you have a different opinion about e-book. But one aim this book can give many data for us. It is absolutely appropriate. Right now, try to closer using your book. Knowledge or information that you take for that, you are able to give for each other; you are able to share all of these. Book Identification Modeling and Characteristics of Miniature Rotorcraft has simple shape nevertheless, you know: it has great and large function for you. You can appear the enormous world by available and read a publication. So it is very wonderful.

Pamela Postma:

This Identification Modeling and Characteristics of Miniature Rotorcraft book is just not ordinary book, you have it then the world is in your hands. The benefit you have by reading this book is usually information inside this guide incredible fresh, you will get information which is getting deeper an individual read a lot of information you will get. This Identification Modeling and Characteristics of Miniature Rotorcraft without we know teach the one who looking at it become critical in thinking and analyzing. Don't become worry Identification Modeling and Characteristics of Miniature Rotorcraft can bring once you are and not make your case space or bookshelves' grow to be full because you can have it with your lovely laptop even

cellphone. This Identification Modeling and Characteristics of Miniature Rotorcraft having good arrangement in word and layout, so you will not truly feel uninterested in reading.
