## Visual Literacy

What does it mean to be visually literate? Does it mean different things in the arts and the sciences? In the West, in Asia, or in developing nations? If we all need to become "visually literate," what does that mean in practical terms? The essays gathered here examine a host of issues surrounding "the visual," exploring national and regional ideas of visibility and charting out new territories of visual literacy that lie far beyond art history, such as law and chemistry. With an afterword by Christopher Crouch, this groundbreaking collection brings together the work of major art and visual studies scholars and critics to explore what impact the new concept of "visual literacy" will have on the traditional field of art history.
